

In Math Class

MPM2D (2007) and Mr. Marshall

Sung to the tune of Jingle Bells

So many new lessons
Require the slope equation
To answer the questions
In coordinate geometry
There's quadratic relations
Which generate parabolas
Solving each of the problems
Using all the available data

Oh, in math class, in math class
In math class we learn
Oh, what fun it is to solve
And identify patterns
In math class, in math class
In math class we learn
Oh, what fun it is to solve
And identify patterns

We see many triangles
That have unknown quantities
To solve these riddles
Use conditions of similarity
Trigonometry is useful
To solve for angles and sides
In any type of triangle
Using laws and ratios supplied

Oh, in math class, in math class
In math class we learn
Oh, what fun it is to solve
And identify patterns
In math class, in math class
In math class we learn
Oh, what fun it is to solve
And identify patterns, yeah

Oh, in math class, in math class
In math class we learn
Oh, what fun it is to solve
And identify patterns
In math class, in math class
In math class we learn
Oh, what fun it is to solve
And identify patterns
