

# The Moon Tune

SNC1D 2007 & Mr. Marshall

At the height of the cold war  
As the Russian space program soars  
American pride had been harpooned  
So Kennedy sets a goal for the Moon  
A challenge to meet before the decade is out  
Many people in the world had their doubts

Hey diddle diddle  
Did we land on the moon?  
For shizzle!  
Hey diddle diddle  
Was the cow closer?  
For shizzle!

Astronauts went to the moon in '69  
Their rocket had a really neat design  
Brought back many moon rocks  
Didn't expect so many to mock

Moon conspiracy theorists are cultural vandals  
They spread their theories, causing scandals  
Claiming the moon landing was a big hoax  
Seeing what sort of response it provokes  
Ignoring evidence with determination  
Raising doubt for each new generation

Persuasive arguments exist to get you sidetracked  
Without understanding they can have an impact  
So Reflect

Reject

Suspect

Inspect

Object

Correct

So that you can be certain when forming your opinion

The stars in the sky are abundant and bright  
Yet in the photos they were out of sight  
They say that's 'cause they faked the video  
Out in Area 51 in a movie studio

The fact is there was a bright foreground  
So you can't see stars in the background  
A photographer knows this from experience  
Don't give that argument any credence

Hey diddle diddle  
Did we land on the moon?  
For shizzle!  
Hey diddle diddle  
Was the cow closer?  
For shizzle!

No lunar atmosphere to cause a breeze  
Proving once and for all they are phonies  
Seeing the flag sway to and fro  
Caused by the air conditioning gizmo

Yet something odd appears in the movies  
When you look a little more closely  
The flag doesn't sway when they run close to it  
Taking away that argument's credit

Hey diddle diddle  
Did we land on the moon?  
For shizzle!  
Hey diddle diddle  
Was the cow closer?  
For shizzle!

Don't be fooled, look in the shadow  
The detail visible is way too thorough  
Multiple light sources is the only explanation  
To illuminate events on the studio location

Yet lunar soil affects light in many ways  
Scattering it into areas that were once dark and grey  
A common effect occurring even here on Earth  
Face it, that argument is losing its worth

Hey diddle diddle  
Did we land on the moon?  
For shizzle!  
Hey diddle diddle  
Was the cow closer?  
For shizzle!

The take off and landing the whole world saw  
East Germans and Russians found no flaw  
Retro packages were left at each and every site  
Continuing to gather data each and every night  
Bring that up to conspiracy theorists  
Witness openly their bias  
To neglect evidence that may contradict  
That NASA committed the ultimate trick

Persuasive arguments exist to get you sidetracked  
Without understanding they can have an impact  
So Reflect

Reject
